

Word Exercise 05 – SmartArt

Directions: - Create a Word file. Name it correctly and save it in the right location.

Using SmartArt create a graphic that will represent the following:

- Think about what you would like as your career (or achieve) when you are done with School (this means college as well, if you are planning on attending college)
- Next, think about the activities or hobbies you are currently doing or have done.
- Next, think about new activities or hobbies you are planning or you really want to do.
- Next, create a graphic using SmartArt with the following requirements:
 - **Bottom level** - all the activities and hobbies you have done or you are currently doing
 - **Middle level**- all the activities and or hobbies you are planning on doing in the future
 - **Top level**- Think about what you want to do after high school and beyond. For example, a career, what type of degree are you wanting to get or how many degrees (if more than one degree level, add another row).
- Your whole chart will have 3 or more row levels. The bottom row will represent what you have done or what you are currently doing.
- Be creative with your graphic SmartArt and the formatting options it provides.

After you create your SmartArt Graphic write a one paragraph review and reflect on your graphic. Think about how all you are doing now, or in the near future, relates or somehow relates to the very top row (what you are trying to achieve).

- Your paragraph requires 10 or more sentences.
