

## PowerPoint Exercise 6

### Directions:

#### Journal Research

- **Open a PPT file and name it as PPTExercise06** and
- **Save it in your S: DRIVE** and complete the following:
- Use the images and data from Word Exercise 07 and create a PowerPoint Presentation on your research.
- You can copy and paste all the data. One topic per slide.
- All the data must be on 1 slide per topic, BUT just pick the best picture to place on that one slide.
- So one slide should have a total of 12 bullet points and one picture. For example, 12 points on Autonomy and 1 image on that one slide. Next, go on to the next slide and do the same for the next topic.
- Use Design, slide transitions, and animation to make your presentation nice.
